Easy Usage

The DV 5400 is easy to use with three main buttons. You can always use the Volume +/- button to browse up and down through menus, and to highlight selections. Use the M button to choose or to make your selections. Use the Return button to get back to the previous screen.

Battery

The Delstar DV 5400 TV/Media Player comes with an internal rechargeable battery. The battery is not user replaceable. Fully charge the battery before you use the player for the very first time. We recommend that your initial charge is 10 hours. After your initial chare, it will only take up to 5 hours to fully charge the DV 5400. You can charge your player using the USB port on your computer, but we recommend that you use the ac wall charger (included).

NOTE: ATTEMPTING TO CHANGE THE BATTERY WILL VOID THE WARRANTY

NOTE: Some low-power USB ports may not provide enough power to charge the DV 5400. If the device does not charge, use a USB port located at the back of your computer.

Battery Level Indicator

The battery level indicator is located at the top-right corner of the screen.

Battery Full:

Battery Low:

Charging by AC adaptor

1. Take the supplied USB cable and connect the larger end to the supplied AC wall adaptor.
2. Take the smaller end of the wire and connect it to your DV 5400 via the USB port.
3. It will normally take 4-5 hours to achieve a full charge; this will allow   3-5 hours of constant viewing time.

Charging by Computer

1. Connect the smaller end of the USB cable into the DV 5400.

2. Connect the larger end of the USB cable into an available USB port on your computer.

3. The computer must be on for the USB port to charge the battery. Your DV 5400 will show its connection screen The DV 5400 will be charging while in this mode.

4. To stop recharging, simply disconnect the USB cable.

Main Menu Options

TV- allows you to scan for Digital Signals first, and subsequently watch the digital stations you have located second.

Music – allows you to browse and listen to music, audio books, and recordings The Music Menu includes: All Music, Artist, Album, Genre, My Favorite, Record, Directory, and Update Media Library.

Video – allows you to browse and watch videos.

Photo – allows you to browse and view photos.

Record – allows you to do voice recording using the built-in microphone.

E-Book- allows you to read your electronic books (must be in TXT format)

Tools- allow you to utilize the stopwatch, and the calendar tools.

Game- allows you to play two of the built in games: Slide and Tetris

Explorer- allows you to manage all files stored on either the internal memory (4GB), or the micro SD card (up to 4GB)

Settings- allows you to manipulate the system settings to your personal preferences. The Settings menu includes: Display Setting, System Settings, Desktop wallpaper, Date and Time, Language, System Information, and Automatic Shut Off Time.

Basic Usage

Power Switch

The power switch, located on the right side of the unit, is used to turn the player on or off (see general view).

Power On

Slide the **Power** switch up to turn on the player. The Delstar logo will be the first thing to appear on the screen. The Main Menu will appear after it has been booted up, and you will see the TV icon blinking.
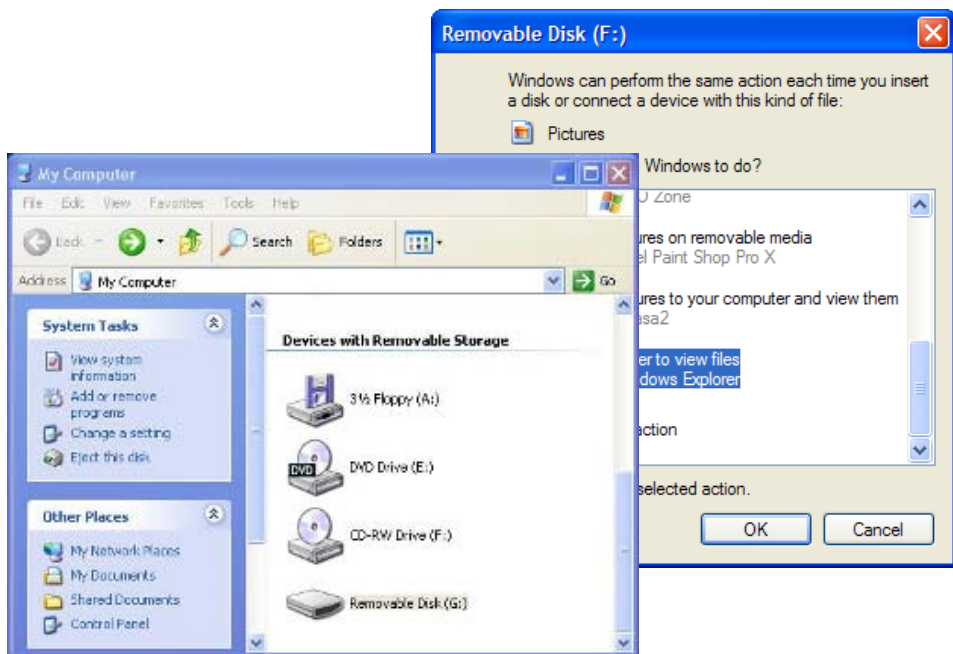

Power Off

Slide the **Power** switch up and hold it for about 2 seconds to turn off the player.

Reset

To reset your player, use a bent paper clip to push the reset button in; you should feel it click over. You will see the screen shutoff and reboot.

Connecting the DV 5400 to your Computer to Manage files

1. Connect the larger end of the USB cable into an available USB port on your computer.

2. Connect the smaller end of the USB cable into the USB port of your player.

3. Your player will show a picture of a computer on the display screen; this indicates that it is connected to your computer.

4. Your computer will recognize the DV 5400 and display the "removable disk"popup menu (shown below) asking you what you would like to do with the drive.

4. You will be able to access the DV 5400 in **My Computer** as a "Removable Disk" (shown below). If you have a SD card installed in the DV 5400 then you will see two "Removable Disk" icons in "My Computer", one will manage all the files on the internal memory of the player (4GB), and the other will allow you to manage all files stored on the external memory of the SD card.

Removing the player from your computer:

WARNING: Do not disconnect the player while it is transferring data! Disconnecting the player from the computer while data is being transferred may damage the player.

Windows – Simply disconnect the USB cable from the player after you have finished charging, transferring, firmware upgrading, or synchronizing files.

Mac – Eject the removable disk by dragging the icon to the Trash and then disconnect the USB cable.

Updating the Firmware:

Delstar occasionally releases firmware updates, which may include new features and performance enhancements. To ensure your Delstar DV5400 has the latest firmware, please contact Delstar or visit our website www.delstar.net. To upgrade the Firmware Go to Setting> System Setting>Upgrade.

Restorable

To restore the DV 5400 to its original settings, simply go to the Main Menu, select System Settings, and select Restorable. Choose yes.

TV

On the main menu, use the Volume+/- buttons to highlight "TV", press the M button to enter the TV menu; you will see the following options: Channel, Program Guide, Search Channel, and TV Settings. Use the Volume +/- buttons to browse through the menu, and then use the M button to choose your selection.

Searching For a Channel

AUTO SCAN

In the TV Settings menu select Search Channel, there will be two options there Auto Scan, and Manual Scan.

Choose Auto Scan from the list by pressing the M button. If you have never ran the scan before it will automatically begin, If you have ran a scan before, the TV will inform you that you are about to change the "program list." if you want to continue with the scan select yes by highlighting it and pressing the M button.

Note: For optimum reception we recommend you put the external antenna (included) into the external antenna port (see general view) prior to running the Auto Scan. Once the Auto Scan has begun allow it to finish on its own. It is very important to allow the scan to finish or else it will not return any channels.

Manual Scan

Opposite to the Auto Scan is the Manual Scan. This will allow you to search for a signal, channel by channel. To run the manual scan, simply open the TV settings menu and select Search Channel. There you will see the two choices Auto Scan and Manual Scan. Select Manual Scan by highlighting it and choosing it with the M button. You will see the following screen:

Once you are at this screen, you can begin scanning manually, channel by channel. To begin scanning a channel, simply highlight the desired channel you want to scan and press the M button. The DV 5400 will begin searching for a signal on that channel; the process will take up to a minute to complete. If the DV 5400 does locate a signal it will bring you to the channel list. There you will be able to select the channel to start viewing. If the DV 5400 does not locate a signal then it will display a "NO CHANNEL" message. Simply retry if it does fail.

The other TV menu options include:

Channel List

The channel list will allow you to see a list of channels and their station names. You can use the volume+/- button to browse through the channel list. To select a channel, simply highlight it and press the M button.

Electronic Program Guide (EPG)

The EPG displays a detailed Chanel guide that lists all of its Show Information.

Subtitles

The subtitle option allows you to enable or disable on screen subtitles. Simply Enable or Disable this feature.

Audio

This feature allows you to see audio information on a certain channel.

TV Settings

 The TV settings sub menu allows you to set up the following three options: Area Setting, Time Zone Setting, and the Daylight Savings Time Setting

This chapter shows you how to transfer music files, photos, and videos from your computer to your Delstar DV 5400.

Loading Content-

Loading Music

You can transfer music, videos, and photos from your computer to the player using the drag-and-drop method.

Drag and Drop (Windows)

1. Connect your Delstar player to your PC.

2. Open Windows Explorer.

3. Double-click on your Delstar DV 5400 player.

4. Double-click on the Internal Memory icon which would be the first "Removable Disk" icon you see. You will see the following folders: Music, EBook, Video, Picture, and Record.

Note: Do not delete these folders!

5. Drag and drop music files from your computer to the Delstar 5400 MUSIC folder.

You can also drag and drop files to a microSD™ card inside your player by going to My Computer > "Removable Disk" (this one usually follows right after the internal memory "Removable Disk").

Drag and Drop (Mac)

1. Connect your Delstar DV 5400 player to your MAC computer.

2. Double-click on the "removable disk" icon that appears on your desktop.

3. Double-click on your Music folder.

4. Drag and drop music files from your computer to the player's Music folder.

NOTE: Remember to eject the removable disk before disconnecting your player.
